# NAME OF THE MEDICINAL PRODUCT

Potassium Chloride 14.9 % Braun concentrate for solution for infusion

### COMPOSITION

1 ml of concentrate for solution for infusion contains 0.149 g potassium chloride corresponding to 2 mmol K<sup>+</sup> and 2 mmol Cl<sup>-</sup>

1 ampoule of 10 ml contains 1.49 g potassium chloride corresponding to 20 mmol K<sup>+</sup> and 20 mmol Cl<sup>-</sup>

Excipient: Water for injection.

### THERAPEUTIC INDICATIONS

Potassium deficiency, in particular when accompanied by hypochloraemic alkalosis.

# CONTRAINDICATIONS

Hyperkalemia; hyperchloremia.

Disorders frequently associated with hyperkalaemia, such as dehydration, impaired excretory renal function, Addison's disease, adynamia episodica hereditaria (Gamstorp disease), sickle cell anaemia.

#### **UNDESIRABLE EFFECTS**

Side effects are only to be expected as a result of absolute or relative overdose and/or excessively rapid administration rates. They correspond to the symptoms of hyperkalaemia. The frequency thereof is dose-dependent.

# Metabolism and nutrition disorders

Acidosis, hyperkalaemia, hyperchloraemia.

# Cardiac disorders

Excessively rapid administration rates can lead to cardiac arrhythmias.

#### Gastro-intestinal disorders

Nausea.

# **WARNINGS**

Keep out of the sight and reach of children. Only to be used diluted, as additive to infusion solutions. Discard unused contents.

# **NOTE**

Prescription only
